SECURITY INFORMATION

REPORT NO.

Military Information from the Weisswasser-Deutsch-Niesky-Horka-

Moyerswerda Area

25X1

PLACE OBTAINED

25X1A

13 to 15 September 1951

DATE PREPARED 27 September 1951

25X1

ENCLOSURES (NO. & TYPE)

25X1X

On 13 September, a convoy of empty trucks driven by soldiers with red-bordered black opalots was seen driving from Moyerswerda toward Koenigsbrueck (N 52/A 31) 25X1C

the same convoy was seen on 14 September. (1)

Indications of the existence of troop camps were noticed in the Niesky-Deutsch-Niesky-Horka area on 14 September.

25X1

No activity was observed at Camp Hocht, although local residents stated that the camp was still occupied.

25X1

A tank exercise was conducted along the Moyerswerda-Lepornitz (O 52/A 55) road, about 2 km south of the Schwarzlitz forester's house. About 30 armored vehicles, including T-34/85 tanks and SU-122 SP guns, and an undetermined number of half-track armored personnel carriers advanced westwards across the Moyerswerda-Lepornitz road in three waves, with infantry troops protecting the flanks. 25X1

25X1A
25X1C

Comments.

The convoy consisted of trucks belonging to the 11th Gds Tank Div and to headquarters units of the 1st Gds Lecz Army. The information agrees with that of another source, inasmuch as no indications of the presence of troops were observed between 3 and 11 September 1951.

25X1A

Although the most recent reports on Camp Hocht were late August, it is not believed that Camp Hocht had been vacated by mid-September 1951. See 25X1A

The statements in the present report by local residents are therefore given credence. The hypothesis is further supported by the fact that, the 5th Lecz Div. all vehicles seen on the road to the camp belong to 25X1

25X1

25X1

The exercise was conducted by components of the 5th Lecz Div. 25X1C
